

~~CONFIDENTIAL~~

15 February 1956

MEMORANDUM FOR THE RECORD

1. In the attached memorandum for Col. L. K. White from Lyman B. Kirkpatrick dated 9 December 1955, the last sentence of paragraph 1 states, "It is gratifying to learn that conditions are not as bad as the numerous cases voluntarily brought to this Staff would appear to indicate." (Underscoring supplied.)

2. The usual connotation of the phrase "numerous cases" would be that there were many cases. The record as developed by the survey of Mr. [REDACTED] does not support that there were many cases voluntarily or otherwise brought to the Inspector General staff. Therefore, for the record and for the information of any person who may in the future review this file, the term "numerous cases" as used in the memorandum of Mr. Lyman B. Kirkpatrick and its usual connotation of "many" is inconsistent with the data contained in the survey prepared by [REDACTED]
